WITH PROFOUND THANKS

Words cannot express the gratitude I feel to everyone who has contributed to the creation of this book. Above all, I am eternally grateful to my Heavenly Father who, in all honesty, is the One who wrote these blends. I believe that God commissioned me to write these blends because He feels the pain of His children. I am nothing more than a vessel to write His ideas. I thank Him for trusting me with such an important task.

First, I want to thank my family. I am so grateful to Alonto Mangandog, my husband, for all the support and faith, and taking care of our children when it was time for me to write, and my children for inspiring me to create a better world for them to grow up in. I thank my sister-in-law and friend, Tishata Mangandog, for trusting in me, and my parents for believing that I can do anything I put my mind to. I owe much to my acupuncture professor, Neil Gumenick, who taught me that we are, first and foremost, spiritual beings having a human experience. And I must thank my herbology professor, Ziv Rosenberg, for teaching me how to construct formulas.

Much gratitude goes to my best friends, Mary Sisti and Genevieve Kim, for always believing in my gifts and talents. Thank you, Norma Strange, for consulting me through the book writing process. And this book would not have been possible without all my business partners and friends who have explored essential oils with me: Jerie Perry, Debbie Ohls, Sarah and Eric Schmidt, Briana Sabig, and Evi and Pete Felarca—I thank you. You have made this book richer and more effective.

Thank you, Lisa Hewitt, for your support with editing. You made this process so painless for me. And I thank Kristal Molina for making my book come to life.

And of course I owe many thanks to my mentor and friend, Rod Richardson. Without you none of this would have been possible. You knew what I was capable of the moment we met. Your faith in me made me believe in myself. Thank you, Rod, for opening my world and always being there when I need you.

FOREWORD

by Rod Alan Richardson

Years ago, I received a focused email asking me to contact Desiree Mangandog who was prepared and ready to engage in essential oils. A two hour phone call followed as we connected, worked out the details and got her oils in the mail and on the way. The next few days, I was emailed again by Desiree and informed that she would still use the oils but that she would be going another direction. Disheartened, but hopeful, I patiently waited. I knew that once passion had been discovered, it would be impossible to stay away.

A few months later, I called and asked Desiree if I could fly to California and have dinner with her and her husband Alonso. She agreed. During our meeting, it was clear that her heart was firmly on essential oils and so our journey restarted. Desiree was familiar with natural wellness as a practitioner and acupuncturist. Essential oils were a perfect match. As time has passed, her gift has become apparent as I watch her talent with oils bless the lives of hundreds and thousands.

Many people live out their existence on Earth however, periodically I've watched as divine designation sets its hand of ordination on specific people. Desiree Mangandog is one of those people. She is a very gifted person with a spiritually appointed mission to bless the lives of others with essential oils. I'm proud to call her friend and hope that her gift will bless your life as she has blessed mine and that you get to know her through these pages as I have had the privilege of doing. After all... You Are Fabulous!

INTRODUCTION

Welcome to the world of emotions and essential oils. I am sincerely honored to share my experiences and knowledge with you on how to use essential oils in the most effective ways.

My Chinese medical training in Classical 5 Elements acupuncture taught me that 99 percent of all diseases are rooted in the spirit. That sounds like a bold statement, considering how our Western culture idolizes science, data and research. It took me 13 years to fully grasp this teaching. I ask you to have an open mind and consider if your emotional/spiritual health could be affecting your physical health.

THE IMPACT OF EMOTION

All emotions have an energetic pattern and unique frequencies. These frequencies affect the way our cells divide, the way our organs function, our hormonal makeup, and how blood circulates throughout the system. Energy is not something obscure—it is measured constantly in the scientific community. I believe there is no separation between the body, mind and spirit. So if you are on a journey of wellness, looking at your emotional health is a must.

This book addresses the most common emotional difficulties that people face every day. The purpose of these blends is to empower you to become your best self, and move gracefully through your life, no matter what the circumstances. Difficulties and obstacles will affect each person. It is how you respond to these situations that will determine your character and personal success. I define "personal success" as finding inner peace, joy and confidence; you don't get worked up over trivial matters, and you see the beauty in every situation.

You deserve to live your authentic self and fulfill your highest purpose. Perhaps you have already seen glimpses of your highest purpose. Maybe you have visualized yourself up on a stage, speaking in front of large crowds, or singing in front of an audience. Maybe you want to be a renowned photographer, writer or chef. Whatever the dream, you deserve to live it. The challenge is moving from where you are today to manifesting the dream as your new reality. My desire is for you to believe in yourself and break through all limiting beliefs so you can make your dreams come true.

Perhaps you have worked hard at achieving your goals, yet no matter how much effort you put in, the result is disappointing. You are nowhere close to where you want to be. But you can't expect a different outcome when you are vibrating at the same frequency as before! You must shift your emotions and create openness throughout your spirit. Used properly, essential oils have the potential to quickly change how your energy and emotions flow.

Changing your thoughts alone will not provide desired outcomes. This is why positive affirmations may not always work. You must change your thoughts and the emotions behind those thoughts.

An old Chinese proverb teaches that

When there is flow, there is no pain

When there is pain, there is no flow

It is paramount that our emotions flow, but pain can block this flow. We are meant to experience all emotions—that is part of being human. No emotion is better than any other. Being happy (or sad) all the time isn't normal. Life happens and people can be hurtful. The problem begins when we become stuck in anger or sadness or some other emotion.

A worse scenario is when a person completely shuts down emotion and suppresses all feelings. Essential oils help you to fully experience the anger or sadness, so that you can finally release it from your spirit. Many people describe it as "feeling free" or "the chains being broken." As you use these blends, your spirit will feel lighter and more expansive.

Allow these oils to help you connect to your emotional self. This will help you to feel the rainbow of emotions that are available to us: love, joy, peace, sorrow, anger, sadness, satisfaction, excitement and more.

THE OIL CONNECTION

We have been taught that aromatic use is the best way for essential oils to affect our moods and emotions. I am going to challenge that mainstream view. Yes, aromas perceived by the olfactory sense do affect the brain and mood immediately. I have also found that topical application of the oils on specific acupuncture points and meridians yield an even greater change in mood. Chinese medicine teaches us that each organ has a correlating emotion associated with it. The lungs are associated with sadness, liver with anger, the heart with sadness, spleen with worry and over thinking, and kidneys with fear. Unresolved feelings can become trapped in these organs, as well as the corresponding meridians.

Have you ever heard of someone who weeps while receiving a massage? Often, this is because trapped emotions have been released from the tissues. Have you known someone who has never been the same after a traumatic accident? The shock and fear become trapped in joints, bones and muscles. It must be released in order to experience optimum wellness. With these blends, I provide locations along meridians that yield quick results. The combination of specific oils and targeted organ meridians will create quick emotional shifts. I look forward to hearing how empowered you feel after using these blends.

Another concept I teach is that you will not need to use any of or blend for extended periods of time. Most of these blends will create change within one to six weeks. Some blends will have an impact within a day. Your emotional/spiritual body will change with consistent use, and you will evolve. And then something else will come up and you will need a different blend to address another layer of thoughts and emotions.

Enjoy this journey of self-discovery and empowerment. My whole purpose in writing this book is to awaken you to your true self. The human community needs you to live out your purpose and step into the highest version of yourself. Love must expand in the world so that people can be free from pain, worry and sorrow.

I appreciate each and every one of you, and pray that you experience permanent healing. And always remember that you are fabulous! God bless.

BLENDING DETAILS

This chapter lays out the basic guidelines for blending these formulas, and proper application methods. Feel free to always use your intuition. My recommendations are just that: recommendations. You know your body better than anyone. If you feel the desire to apply the oils in different locations than suggested, then please go right ahead.

All roller-bottle recipes are crafted for a 5 ml roller-bottle size. If you desire to make a 10 ml size, just double the recipe.

The numbers next to each single essential oil indicate the number of drops. Please add the oils in the order in which the recipe is written. The order does energetically affect the outcome of the blend. Western science may say the chemistry is the same, despite the order of adding oils. But I am concerned with the energetics of the blend, not the physical chemistry.

Please use fractionated coconut oil to fill your blends. It is the most neutral carrier oil for essential oils.

And most importantly, make sure your essential oils are pure and therapeutic grade.

APPLICATION METHODS

There are two things to consider with application methods: location and frequency.

You may apply these blends in any location you prefer. Below are descriptions of common locations and how they may facilitate the oils' effect. Exercise your intuition as to where to apply your blends. We are all different. One blend may yield great results on the inside of wrists for one person, and the same blend may work better on the back of the neck for someone else.

Some of the blends will have specific instructions on where to apply. These recommendations are based on meridians and acupuncture points that I have found to be the most effective.

Blends may be applied as often as needed. One to five times a day is sufficient.

A few blends are extremely potent and will not require an application of more than once or twice per day and I do indicate which blend falls in this category.

Please be cautious with citrus oils and sun exposure. Bergamot, Lime, Lemon, Wild Orange and Grapefruit can burn the skin if they are applied topically and exposed to the sun. Apply blends containing citrus to the bottoms of the feet if you know you will be out in the sun.

LOCATIONS OF APPLICATION

1. Inside of elbow creases

This is one of my favorite locations to apply oils for emotional well-being. The lung, pericardium and heart channels run through the elbow crease. When applied here, the oils quickly enter the lungs and the heart. In Chinese medicine, these organs are related to sadness and grief.

You'll experience the sensation of your chest opening and feeling lighter when you apply blends to the inside of elbow creases.

2. Inside of wrist creases

The lung, pericardium and heart channels also run through the wrist creases. Essential oils applied here also move quickly to the chest. This is an easy, accessible location to apply oils.

3. Inside forearms

Roll up and down the inside of forearms—both sides—to have oils circulate quickly throughout the body. Many veins are close to the skin on the inside of the forearms, so the oils enter the bloodstream rapidly. This is the best location to instantly create change in your emotional state.

4. Back of neck or spine

Apply blends to the back of your neck or spine when you need mental clarity. It is a quick way for oils to enter the brain.

5. Over the heart area

This location is on the sternum, between the breasts (or nipple line). It is not the literal heart. Apply blends here when dealing with heartache and disappointment.

6. Around the belly button

This is a special place to apply oils. My favorite oils to apply around the belly button are those related to protection and boundaries, and an increase in immune-system function.

7. Up and down midline of the belly

Apply oils here when they're related to self-confidence and self-worth issues. Your belly has many serotonin receptors that contribute to feelings of happiness and self-esteem. The belly is an underutilized location for essential oil application. As when applying to the inside of the forearms, you will feel the shift immediately when applying oils on the belly.

8. Bottoms of feet

This is one of the most popular locations to apply oils. This is the preferred location when you need calmness and grounding.

9. Inhale from the hands

Sometimes you just want to inhale the oil. One inhale sends the aromatic compounds to the brain and shifts your entire chemistry. Every blend can be used through inhaling alone.

Blends for
Letting Go

Release your Fears

Release Your Fears is designed for the individual who is paralyzed by many fears. You may have difficulty moving forward and embracing change. These fears are not logical and may have been ingrained from a childhood trauma. Even being made fun of in school can create disastrous effects in adult life. All these fears can prevent you from living your life fully and waking into your light. Of course these fears are all based on lies, and this blend will break the pattern of feeling stuck. Telling yourself to stop being afraid will not break the pattern. It is an energetic vibration that has been trapped in your soul. Using Release Your Fears will shift that energetic pattern and transform it to a higher vibration.

BLEND BREAKDOWN

Clario helps you release old patterns that no longer serve you. Remaining stuck in a state of fear every moment of every day is a toxic state of being. Clario liberates you from being trapped in fear. It is by far the best oil to break a toxic pattern because it releases lower energies. In Chinese medicine it is said to crack the Qi (energy).

Juniper Berry helps to release fears in general. It brings the fear out of its hiding places and helps you to see it for what it truly is. When looking at the fear straight in its face, you realize how small and insignificant it is. Many times we make a mountain out of a molehill.

Lemon powerfully cleanses out the fears and purifies that low vibration energy.

Basil replenishes the soul and brings your vitality back. Being afraid is exhausting and drains vital energy.

Black Pepper is the best oil to break addictions. Being in a constant state of fear is also a type of emotional addiction.

Cinnamon guides you to stand in your power. It is an empowering and uplifting oil.

Cedarwood strengthens the lungs and improves breathing patterns. Living in fear causes shallow breathing. This leads to less oxygen to the brain, which then leads to more anxious feelings. Cedarwood breaks the vicious cycle to improve breathing and increase feelings of calmness.

Hawaiian Sandalwood quiets the mind so you can connect to your intuitive body. This oil brings you into your heart space and allows you to listen to the deepest parts of yourself.

Bye Bye Baggage 🍃

Bye Bye Baggage assists you in releasing any kind of toxic people, places, or circumstances from your life. Generally we know what and who are healthy and nourishing to our lives. However, often we can become addicted to what is unhealthy for us. This blend will help you identify the negative baggage in your world and create a desire to shed all that baggage, for good! This is a very transformative blend that helps you transition into a new way of being.

BLEND BREAKDOWN

Hawaiian Sandalwood lifts your vibration and brings heightened spiritual awareness. This is the oil that will clearly identify the baggage in your life.

Frankincense is another great oil that brings the baggage to light. Many times awareness alone creates motivation for change. Frankincense helps raise that awareness.

Cedarwood helps identify the supportive individuals in your circles who love you unconditionally.

Cinnamon is the epitome of empowerment. This oil helps you find your power and makes you stand strong in your truth.

Eucalyptus raises your standards. The quality of your life is determined by the standards you live by.

Lemongrass is a cleansing oil that helps rid the spirit of toxic, negative vibrations. This oil works to release all the baggage that needs to be dumped from your life.

Melaleuca helps create necessary boundaries that keep parasitic relationships out, and only allows closeness with loving, supportive individuals. Parasitic relationships include those who take advantage, complain, or are emotionally, verbally, and/or physically abusive.

Thyme is the oil that teaches you to forgive others. Even with enemies, it is important to forgive because it opens you to spiritual healing. You can forgive and keep healthy boundaries at the same time.

White Fir is the best oil to break negative patterns, including codependent relationships, enabling, and abusive relationships. Many of these negative emotional and spiritual patterns are taught to us by our parents and grandparents.

Douglas Fir gets you excited to live a life with healthy boundaries and higher standards.

Bye Bye Love

Bye Bye Love is the breakup formula. Breakups are never fun. However, this blend will help make the painful process bearable. It will give you perspective on why the breakup happened, and remind you that you will survive this hurtful time.

Bye Bye Love may also be used when severing a friendship. Even longtime friendships may come to an end when the relationship is unhealthy. This blend will help you find comfort and solace in this transition period.

BLEND BREAKDOWN

Cinnamon helps you to love yourself and keep your heart open. It's common to feel worthless or inadequate when a relationship ends. We tend to ask ourselves "what is wrong with me?" There is nothing wrong with you. Some relationships are meant to last for a season.

White Fir and **Douglas Fir** both bring perspective to why the relationship did not work out. The relationship may have been a result of destructive patterns, enabling addictions and codependency. Once there is awareness as to why the relationship is unhealthy, it becomes easier to move forward and let go. **Douglas Fir** shows you how to learn from the past and be excited about a new chapter in your life.

Bergamot provides feelings of "everything is going to be ok." Sometimes we lose our identity in parasitic relationships. **Bergamot** takes you on a journey of self-discovery.

Wild Orange brings hope for a brighter future. It reassures the soul that more friends and love relationships are waiting for us. **Wild Orange** also teaches us to trust in the timing of things. The right people will come into our lives at the right time.

- 8 White Fir
- 5 Douglas Fir

Clear The Clutter

Clear The Clutter is used when you feel the need to purge clutter out of your life. It is common in our modern society to accumulate stuff and rarely clear our home of unnecessary items. Accumulation of things is a part of a high-consumption, Western culture. The reality is too much stuff drags us down. When we let go of excessive things, more positive flow occurs in our life. **Clear The Clutter** will create the desire and excitement to sell, donate or gift the clutter in our home. So if you have been wanting to clean house but couldn't find the energy to do it, then use this blend to help shift your attitude.

BLEND BREAKDOWN

Lemongrass is the most powerful clearing oil. It completely wipes out low vibrations of "holding on to things." Lemongrass shows you that your self-worth is not connected to the items you own, and empowers you to let go.

Lime brings gratitude to the heart. It helps you to be grateful for the simple things, such as the ability to breathe and walk. Lime promotes feelings of appreciation for all that you have and the desire to bless others with the excess.

Lemon provides the necessary focus to stay the course and commit to eliminating excess.

Cinnamon gives you confidence. No matter how big the task of de-cluttering, cinnamon reminds you that you can do it, one item at a time. It provides hope that there is light at the end of the tunnel.

Arbutin reminds you to trust the journey, as it may be an emotional process of letting go. It provides feelings of strength and security through the change.

Douglas Fir gives you renewed energy and excitement for a new chapter in your life.

Place drops in a 5 milliliter bottle. Fill the rest with fractionated coconut oil. Apply to back of neck, throat and inside of elbow creases. Use twice per day.

DROPS

- 8 Black Pepper
- 8 Clove
- 8 Lavender
- 5 Eucalyptus
- 1 Coriander
- 1 Bergamot
- 2 Lime

Just Say No!

Just Say No is the blend of choice for the person who chronically says "yes" to everything. Many times it's a mother who over commits to a daunting number of projects, events, and responsibilities. This blend is perfect for those who have extremely long "to-do" lists.

Just Say No will help you do just that. "No" is a beautiful word that is under-utilized. One of the great side effects of using the blend is the ability to filter out when you should say "yes," and when you shouldn't.

BLEND BREAKDOWN

Black Pepper brings about honesty with yourself. With this oil, you will know what people and situations you desire to be a part of and which ones you don't.

Clove is the key oil in this blend that will help the word "no" gracefully roll off the tongue. The people around you will feel how much you mean it and will respect your boundaries.

Lavender assists all aspects of communication. The more you use lavender, the more you speak your truth.

Eucalyptus empowers you to feel that you can set healthy boundaries and that it won't compromise relationships. Many people are afraid to say "no" because of the fear of being rejected. You may be surprised to realize that people will respect you more when you clearly know and verbalize your boundaries.

Coriander helps you to be honest with yourself. Why are you saying "yes"?

Bergamot melts away the burden of too many responsibilities. It brings lightness to the heart.

Lime gives a little kick in your step. You will feel excited to discover the power of saying "no" and how much it frees you to say "yes" to the people and things that truly matter.

On My Path

On My Path is used when you are on the journey to discover your deepest purpose in life. It's a blend of self-discovery. In our fast-paced, technology-obsessed society, many people rarely take the time to just sit and listen to their own voice. *On My Path* will provide moments to connect with your higher power and your deepest self. This is an excellent blend to apply before prayer/meditation.

I recommend taking a moment of silence and take deep, diaphragmatic breaths before applying.

BLEND BREAKDOWN

Hawaiian Sandalwood calms and opens your heart to communicate with your higher power. It is in this stillness where truth can be heard.

Lavender allows you to verbally express your truth with confidence.

Frankincense dispels confusion. Only truth shines in the presence of Frankincense.

Be Yourself

Be Yourself is used when a person is on a journey of self-discovery. The noise of society, family expectations, and what media teaches often are in conflict with your true nature. This blend guides you to be true to yourself and never let another person define who you are and what you are capable of. We are limitless beings with abounding creative energy. Our role is to focus that energy into the projects we are meant to bring to fruition.

Another dilemma in our modern world is too many choices. A wise soul knows what he or she is meant to be doing in the present moment and responds with action. Allow the *Be Yourself* blend to guide you back to you. It will help you honor the magnificent being you are, and keep you honest with yourself. This is ultimate self-acceptance. All the answers you seek can be found within you.

BLEND BREAKDOWN

Bergamot helps you to fall in love with yourself. It is the oil that teaches unconditional self-acceptance. Bergamot eliminates negative self-criticism that stops you from moving forward.

Coriander is the oil of honesty. Most people are in denial of their passions and dreams in the effort to be "practical" and pay the bills. Coriander will lead you to be honest with yourself and demand more out of life than just making a living.

Clary Sage opens your spiritual vision to see your truth. When you become intimate with your spirit, you will begin to genuinely understand who you are and the power that resides within. This will blow your mind.

Frankincense obliterates darkness and brings the truth to light.

Cinnamon ignites passion and enthusiasm for living your purpose.

Spearmint instills confidence and brings clarity to your truth.

I Am Free

Using this blend regularly will help you see that you are free to choose a different path, and indeed, there are many options. As humans, we are all free. The lie is the perception that we are stuck and have no other choices.

BLEND BREAKDOWN

Cinnamon can almost perfectly reveal the truth of your life. Any masks will fall off and you will realize how your own actions and thoughts contribute to your present circumstances.

Speak Your Truth

Speak Your Truth is for the individual who has lots of opinions and thoughts, but never verbalizes them. It is critical to express our thoughts and feelings with people around us. Sometimes we don't share what we think because we are afraid someone may get offended or take it the wrong way. As a loving friend or family member, you have a right to say something if you think the other party is in danger or caught up in practices that are destructive. That is an act of true love. Friends tell you the truth, even when it hurts.

The other use of this blend is when you have been holding back your true nature from the world. For example, a college student who is in the thick of medical school, but has a deep passion for singing. Most people would call this person insane to leave medical school when in actuality her calling is singing.

- 2 Douglas Fir

Mend the Heart

Mend the Heart is for the brokenhearted. At times, loved ones betray our trust or make choices that disappoint. Using this blend will help heal the damage and mend the wounded heart. It may also help restore trust in people and give hope for those who have wronged us. *Mend the Heart* will prevent you from falling into bitterness, resentment and grudges against those who created the pain. Often, betrayals cause you to form a wall to prevent others from fully entering into your heart. This blend should be used immediately after hearing the shock of a betrayal/dissappointment.

BLEND BREAKDOWN

Ylang Ylang is a significant heart-nourishing oil. Pain might create energetic holes in the heart. Ylang Ylang rushes straight to the heart and fills those holes. Hence, this oil restores the childlike innocence and joy we all once experienced.

Helichrysum is known as "liquid stitches." Where Ylang Ylang fills up the holes, Helichrysum acts like the stitches that hold the emotional "issues" together until the heart fully heals. Within a month the heart should be fully restored and the emotional issues fused back together.

Juniper Berry allows you to truly feel the pain of betrayal in order to release it. *Mend the Heart* is not about ignoring the pain and forcing it to quickly go away. Most individuals ignore pain and stuff it down (often using addictions as a salve) for years. This brings ongoing uneasiness. To facilitate healing, it is important to embrace and fully feel the pain—endure the ugly cry so that you become stronger and move on, feeling restored.

Wild Orange brings brightness to the heart.

Myrrh nourishes the heart, reminding you that everything is going to be OK. It helps you to remember that you have all the love and support you need to make it through.

This blend is especially for those who are afraid to create intimate bonds with others. It takes vulnerability to connect with another person, and sometimes it's scary to open our hearts wide. However, true love and joy are experienced in that vulnerability.

You may benefit from this blend if you were hurt in the past, and then decided to create a wall and not let anyone get close to your heart. It's a defense mechanism. However, if that wall is up all the time, then love can't enter in, either.

Blends for the
Mind

Decisions, Decisions

Decisions, Decisions is a blend that helps an individual with small or large decisions. The person who benefits the most from this blend is one who has the most difficult time making any kind of decision for example, when you go to a restaurant, look at the menu, and are completely paralyzed because you can't decide which item to choose.

Another great time to use this blend is when you have come to a fork in the road and have to make a significant decision that will alter the course of your life.

BLEND BREAKDOWN

Basil is excellent for the overwhelming kind of stress that leads to indecision.

Grapefruit guides you to make the best decisions that are nourishing to the body, mind and spirit.

Lavender allows you to express your needs to others. It will help you to access inner thoughts and desires that have never been expressed. When uncovering these things, lavender will aid you in making the best decisions for you.

Thyme brings up suppressed emotions to the surface. Ignoring these emotions can cloud judgment. By uncovering those emotions that have been buried, more clarity will emerge and decision-making will be effortless.

Wintergreen helps you let go of everything needing to be perfect. Perfectionism can cause a paralyzing fear of making the wrong choice, resulting in what is known as "analysis paralysis"—taking no action. This oil will help you to make a decision, even if it isn't perfect. Course correction can be made anytime, but it requires forward movement. The journey begins with making a decision.

DROPS

5 Basil

8 Grapefruit

10 Lavender

3 Thyme

1 Wintergreen

Place drops in a 1/2 oz roller bottle. Fill the rest with fractionated coconut oil. Apply to the temples and back of neck. Be careful not to get the blend in your eyes.

Collected is for those who spread out attention in a million different directions. You may be easily distracted and over committed—the mom (or dad) who says “yes” to everything and everyone, even when she would rather not. This means she’s always on the go and never takes time for herself. **Collected** will help this over committed type to slow down and make self-care a priority.

A very grounding blend. **Collected** will help you to allow yourself to accept divine grace. It also helps to raise the awareness that you are not alone doing everything; you have God, who is the source of all power and energy. If you’re using divine energy you should not be exhausted all the time. Exhaustion is a sign that something is off balance.

Place drops in a 5 ml roller bottle. Fill the rest with fractionated coconut oil. Apply to back of neck, behind ears and inside of wrists. You can apply this blend up to five times per day.

Collected

BLEND BREAKDOWN

Arbovitae helps you to trust that God is the one leading the details of our lives, and we are not alone in taking care of everything. When we realize that God is in control and has everything handled, this can bring us to a deep sense of peace.

Lemon cleanses the soul of low vibration. The idea that you have to take care of life's demands all by yourself is most definitely a low vibration. Lemon also can bring joy to the heart, clear the mind, and give you the gift of living in the present moment.

Myrrh is a nourishing oil for the heart. This is best for those who have difficulty trusting others because of a previous betrayal or disappointment. Myrrh helps begin to open the heart and bring people back into our lives.

Patchouli helps to ground the spirit into the body. Often you may be easily distracted because there is a disconnect between the body and the spirit. Patchouli helps to integrate the body and spirit, and helps you learn to operate with them in union.

Cedarwood is another grounding oil. Its main purpose is to help you recognize that you are a part of a larger community, and that this community desires to support you in your journey. No one is an island. Your divine life purposes require a loving community surrounding you for encouragement and support.

Clary Sage provides a bigger picture of what is going on. It opens the mind's eye to the truth. This will open you to new ideas and allow for a major paradigm shift. Making the change from always saying “yes” to saying “no” and asking for help, requires an enormous shift in mindset. Clary Sage can assist in this transition by helping you to see the importance of allowing people to help.

Coriander encourages you to honor yourself and do what is right.

White Fir helps break patterns of doing it all without any help. In Western culture, this behavior pattern is an epidemic, especially for women. Women are expected to have successful careers, be the perfect mom, cook every single meal, keep the house perfectly clean, and make sure the kids are involved in many sports/activities. This is a lot of pressure on one person, and it is not sustainable.

Vetiver allows you to become more rooted. This will dispel feelings of being “scattered.”

Grapefruit teaches you to respect your body by giving it what it needs. This may mean taking a nap, exercising, getting a massage, or anything that nourishes your body and soul. And it gently teaches you that you deserve to take care of yourself without any feelings of guilt.

Frankincense is used in the blend to enhance and harmonize the entire formula. Another great function of Frankincense is to help protect from negative influences.

Responsibilities

Responsibilities: Sometimes the word conjures up negative, heavy emotions. This blend is for you if you feel overburdened by the weight of all your responsibilities. I know all too well the crushing feeling and self-disappointment when not taking care of all my "responsibilities."

If you are ready to be free from that heaviness, then use this blend! It will give you greater perspective on what you actually are responsible for and what you are not. My guess is that you've created a longer list of responsibilities than you should. It's time to learn to delegate and ask for help. In our Western society, often women take on too much! There is this expectation of having to be the perfect mom, cook every single meal, have the ideal career, keep the house perfectly tidy, home school the kids, stay in shape, be the perfect wife, and be perfect at everything! And get eight hours of sleep every night. This blend will definitely breakdown that ridiculous view.

Lime is another great oil for clearing frustration.

Arbovitae helps to release that controlling nature of, "This is how it has to be done." This oil brings grace and flow to the spirit, so that you experience peace. It's a great oil for letting go of the need to be right.

Frankincense heightens feelings of peace and serenity. It's a great enhancing oil to Arbovitae. You can joyfully take care of your responsibilities and be grateful for them.

Clarity

Clarity is an excellent blend for those who struggle with constant confusion, especially those who experience "foggy brain." Some describe it as a dark cloud in and around the head. The oils in *Clarity* open up the mind and get rid of the muck that creates low energy. You will be able to hear yourself think, be very present when communicating with others, and radiate vibrant energy.

BLEND BREAKDOWN

Eucalyptus and **Douglas Fir** both powerfully opens up the brain and create massive energy flow. In Chinese medicine the foggy brain is referred to as "hidden phlegm" in the mind. These oils assist in breaking through the hidden phlegm. This isn't literal phlegm—it is a thick, sticky energy.

Lemon also breaks down hidden phlegm. It is responsible for clearing the mind of negative thoughts and bringing positive ideas to the surface.

Peppermint is another head-opening/clearing oil. It creates movement of energy. Peppermint also resolves feelings of frustration and irritability associated with "foggy-headedness."

Rosemary assists in the transition of confusion to clarity. Sometimes it can be difficult to believe that your life can change for the better. Rosemary brings confidence that it is possible to improve your current situation.

Melissa shows you how brilliant and beautiful you are. It is difficult to have low energy when you see how powerful and important you are in this world.

Wintergreen allows you to abandon your worries and fears, and trust in the journey of wellness.

Lemongrass clears destructive thoughts that tear you down. This oil helps you let go of old ways of thinking and embrace the new patterns of empowering beliefs.

Abundance
Blends

More Money Blend

The *More Money Blend* is used when you literally feel it's time to increase money in your life. This blend is philosophically deeper than it seems. It takes a certain way of being to attract more money into your life. There must be openness and willingness to receive blessings. Most individuals struggle with feeling undeserving/unworthy of receiving wealth, and live in a space of scarcity. The *More Money Blend* helps to revise how you feel about abundance and allows that abundance to flow freely into your life.

BLEND BREAKDOWN

Eucalyptus is the best oil to use when you are stuck in scarcity mindset. It creates the desire to expand and recognize that you must take ownership of your circumstances. If you can create scarcity, you can surely create abundance.

Momentum

Momentum is used when you are about to embark on a new journey that requires significant effort to get going. This is comparable to the amount of energy required for a train to leave the station: there is a great push at first, but after awhile the train maintains high speeds with less effort.

Use *Momentum* in situations such as when you're starting a new business or a new project, beginning to take care of your physical health, entering into college, or something similar.

This blend will help you gracefully move into new beginnings and quickly get traction toward success. The side effect is rapid expansion into yourself—meaning your gifts and talents will expand at an astronomical rate. You should use this blend only when you are ready for increased activity and change.

More than Enough

More than Enough is a blend to bring you to a place of abundance. Most people live from a place of scarcity and feel there is never enough money, time, talent or creativity. And that space is intensely stressful. It is important to feel that there is more than enough—further, that there is too much abundance and you are overflowing with blessings. We forget that abundance first comes within, and then it manifests outwardly. *More than Enough* will bring feelings of complete satisfaction, peace and a desire to give to others. You will recognize that you already have everything you need and begin to see all the beauty that exists around you.

BLEND BREAKDOWN

Most people who have difficulty saying no are those who care deeply about the opinions of others. But remember, the opinions of others do not define who you are. **Boundaries** also helps protect you from letting in people who may not have the best intentions—for example, those who take advantage, steal energy, dump their problems, lie, and have wicked hearts. BLEND BREAKDOWN

Cedarwood helps you to feel the spirit realm, so you can feel divine presence and the angels around you.

Lavender increases your listening skills and the ability to pick up subtle vibrations of people, plants and things. Lavender is the reason why you would intensely feel the love from another person. It magnifies heart-to-heart connection.

Juniper Berry releases any fears associated with feeling good. Some people believe that they don't deserve to feel happy. Juniper Berry allows you to feel good without the guilt.

Cypress moves energy all throughout your body and spirit. It is stagnant energy that blocks you from experiencing the magic that already exists. Cypress creates openness so that you can see the love around you.

*Note: This blend is equivalent to the Fairyale blend in the book.

Clear the Clutter

Place drops in a 5 ml roller bottle. Fill the rest with fractionated coconut oil. Apply to back of neck, across forehead and temples, and inside of elbow creases.

Clear the Clutter is used when you feel the need to purge clutter out of your life. It is common in our modern society to accumulate stuff and rarely clear our home of unnecessary items. Accumulation of things is a part of a high-consumption, Western culture. The reality is, too much stuff drags us down. When we let go of extraneous things, more positive flow occurs in our life. *Clear the Clutter* will create the desire and excitement to sell, donate or gift the clutter in our home. So if you have been wanting to clean house but couldn't find the energy to do it, then use this blend to help shift your attitude.

BLEND BREAKDOWN

Lemongrass is the most powerful cleansing oil. It completely wipes out low vibrations of "holding on to things." Lemongrass shows you that your self-worth is not connected to the items you own, and empowers you to let go.

Lime brings gratitude to the heart. It helps you to be grateful for the simple things, such as the ability to breathe and walk. Lime promotes feelings of appreciation for all that you have, and the desire to bless others with the excess.

Lemon provides the necessary focus to stay the course and commit to eliminating excess.

Cinnamon gives you confidence. No matter how big the task of de-cluttering, cinnamon reminds you that you can do it, one item at a time. It provides hope that there is light at the end of the tunnel.

Arborvitae reminds you to trust the journey, as it may be an emotional process of letting go. It provides feelings of strength and security through the change.

Douglas Fir gives you renewed energy and excitement for a new chapter in your life.

Calm the Beast

Do you have rage spells when you are screaming at everyone? I'm married with two boys, and I definitely have moments when the anger gets the best of me. It's as if I turn into another person. A raging beast rears its ugly head, and I am not fun to be around.

When you feel the anger welling up, diffuse **Calm the Beast** blend. Immediately it quiets the rage and allows you to take a deep breath. This blend has the capability to prevent unnecessary fights and hurt feelings. And yes, ladies, it's even good for the anger/moodiness that comes with monthly cycles.

BLEND BREAKDOWN

Frankincense clears low vibrations—such as anger—from the spirit. It also opens up communication with God/universe so that you can experience more love in your heart.

Lavender soothes the heart and opens constricted energy. Anger is a severe constriction of energy.

Arbovitae brings peace and grounding by helping you "let it go."

Lime brings on the giggles! This oil has a special way of bringing joy to the heart. It helps to free the liver and release the pressure of constricted energy. In Chinese medical theory, the liver organ is associated with anger and frustration. Imagine a pressure cooker releasing steam. Lime releases the pressure built up in the liver, and it will cause you to take a big sigh of relief. Which then leads to a big smile.

Sleepy Nights

This is an incredibly pleasant-smelling blend! Use Sleepy Nights 30 minutes before bedtime to prepare yourself for a restful sleep. It will calm your mind and put you at ease. This blend is excellent for those who fight going to sleep and desire to stay up all night. Sleepy Nights creates deep relaxation of the body, mind and spirit. It calms your heart and makes you feel like everything is just fine. You'll feel it gradually melt away the stresses of the day.

*Note: If you are a highly sensitive person (meaning sensitive to feeling other people's emotions and sensitive to your environment), then I recommend eliminating Lavender from this blend. About 95 percent of the population does well with Lavender for sleep. But in the remaining 5 percent, Lavender can keep them up at night. If you aren't sure if you are a hypersensitive, then you can test first with Lavender to see if it keeps you up.

BLEND BREAKDOWN

Juniper Berry helps release the fear of listening to your mind. People often watch shows, movies, read books, or work until they fall asleep because they are afraid of listening to themselves. Juniper Berry shows you that your mind is not a dark place; instead, there is light and beauty that resides within. This prepares you for sweet dreaming.

Cedarwood brings comfort in knowing you are loved and protected.

Wild Orange brings pleasant thoughts into your mind before bed.

Lavender settles the spirit so you can relax into a deep sleep.

TESTIMONIALS

"My absolute favorite is **Soll My Mind**. As a Wife, Mom, Home school Teacher, Business Owner, and so much more, my mind is always busy. Applying the **Soll My Mind** blend is my go to, to help calm all of that mind chatter down. I love to roll it on the inside of my elbow crease, the back of my neck, and temples right before I go to bed so that when my head hits the pillow my mind can relax. My daughter (9 years old) also loves to use the blend to help her go to sleep! Thank you Desiree, for the blend and so many more that inspire change and healing in my life!"

Johanna Bradley

I put **Speak your Truth** on my throat before my counseling appointments and my do words fly out of my mouth! I also use it when I need to talk and I am nervous, say before class or bringing up a hard topic with my husband! It helps to bring words from my brain to my tongue.

Bye-Bye Baggage is also great for decluttering your house, garage and your emotional baggage. You should see the yard sale pile I have and the weight that I have emotionally shed. I feel lighter in my soul!

Amanda Hill

"I have been using the **Manifestor's Blend** for several months and have successfully manifested an array of what I have put my focus on. It has made a huge difference in my life. It has also allowed me to stay within my faith and know that God will provide what I need. It truly has helped me release stress and know that I can manifest my dreams to reality. Thank you so much!"

Kori Abell

"**Soll My Mind** helped me when I had jet lag and could not sleep. Applied **Soll My Mind** and got great night's sleep. Also sometimes can't go to sleep for hours because of my mind racing. Applied **Soll My Mind** and was able to get good night's sleep. Love this blend!"

Wanda Stephens Thomas

"The **Move Money** has had a huge impact in my life. I've found that when I use it I find money in random places. Money just kind of shows up! Money that I didn't have in a jacket pocket, or in my wallet. (I always know exactly how much cash I have, so for money to appear is crazy.) I've found when I use it, I don't stress about money."

Bree Aulph

"My first blend experience was generously given to me by a friend. When my mom passed away from cancer a few months ago, my blend made my dad, sister and me a roller of **Out of Darkness**. I used it multiple times a day whenever I felt the flood gates opening or when I just felt despair. I began to find comfort in the scent. Knowing each oil was giving my heart and soul something it needed. The oils and love behind the gift made coping with the loss of my amazing mom a little easier to bear. I was and am able to cope better knowing that she is free and someday I will see her again. The **Out of Darkness** blend didn't make me numb, it simply provided another source of joy and hope at such a difficult time."

Abby Rose

"The **Committed** blend helped me do things as a mom that I put off to do and procrastinate. Since I started using the **Committed** blend six months ago I have adapted the habit of following through with the task that I need to do and it helps me feel good about myself. Gives me the energy every day to do whatever I've committed myself to do my pile of paperwork, from working at home or from putting away the piles of laundry."

Sara Gomez

"**Bye-Bye Baggage** has helped me release emotions and things that no longer served my highest good. It also helped me not sweat the small things that really don't matter. It made everything seem so effortless for me, especially letting go of what no longer served me. I am so grateful for this blend along with the work you are doing for the world and humanity."

Paige Worley

"I started with the **Manifestor's Blend** to really help me focus and pinpoint my true desires in my personal life and business. I have always had the faith and vision but needed more clarity in the direction I was headed. I use this blend a few times a day by taking a deep breath and visualizing myself both walking my path and at the end of my current journey. There is a feeling of encouragement, trust, and an abundance of joy as it truly grounds me into knowing I am doing all the right things and I will succeed."
